

Before

All of Mother Nature's elements – sun and heat – that make for a great park experience and successful season also have a negative impact on the appearance of water ride attractions.

And since most theme park visitors often equate a fresh appearance with cleanliness and safety, the visual appearance of water slides can have a profound impact on attracting new visitors and giving you an edge over the competition.

Park owners and management are continually seeking new ways to maintain, improve and upgrade the curb appeal of water park attractions. Sun Shield Coatings has developed a revolutionary line of coatings to restore, protect and enhance the visual appearance and luster of water slides and wet ride attractions.

After

SlideRenu™

APPLIED BY EXPERIENCED SLIDE TECHNICIANS

Two-thirds of all coating applications fail due to inadequate surface preparation and improper application procedures. Sun Shield Coatings has developed a variety of proprietary surface preparation products, cleaning procedures and training programs. We have established exclusive partnerships with a number of regional contractors who are skilled and experienced water slide technicians that have been trained by us in the proper methods to clean and apply our restoration products. INTRODUCING SlideRenu™

SlideRenu™ is a revolutionary line of protective restoration coatings that have been formulated specifically to restore, protect and rejuvenate color faded water slides. We are the only company in the water park industry that offers a “turnkey” solution to one of the most pervasive problems facing water park management, owners and operators in the industry today. Our unique two-step application process removes calcium deposits, mold, mildew, rust stains, sun tan lotion, wax, dirt, grime and oxidation from weathered gel-coat surfaces; reconditions interior riding surfaces, and enhances the luster and appearance to the exterior fiberglass skin. These high-performance, long-lasting coatings ensure your water slides will retain their gloss, color and beauty for years to come.

WHY USE SlideRenu™

- Reduces or eliminates routine maintenance expenses such as pressure washing, waxing and polishing
- Saves approximately 20% of the life-cycle costs of painting and 30% or more of the costs of gel-coat resurfacing
- Clear coatings may be applied during the season with minimal disruption to normal park operating hours
- UV stabilizers protect your investment from the damaging effects of the sun
- Reduces calcium build-up, hard mineral deposits and pool chemical residue that cling to interior riding surfaces
- SlideRenu™ coatings may be applied to indoor and outdoor water slides
- The only line of coatings on the market formulated specifically for rejuvenating color faded and sun damaged water slides
- Guaranteed against peeling, cracking, blistering and excessive color fading. See our Limited Product Warranty* for more details

SlideRenu™ PRODUCTS

CLEAR SHIELD

- Zero VOC 100% Solids Coating Restores Original Like-New Color & Luster to All Slide Surfaces
- High Gloss Abrasion Resistant Formula for Riding Surfaces
- The Only Clear Coating that Re-hydrates Sun Damaged Gel Coat Resins to Molecularly Bond with the Color Faded Fiberglass Slide Surface

COLOR SHIELD

- Changes the Existing Color on All Weathered Slide Surfaces
- Creates Re-Theming Possibilities and Rejuvenates Older Slides Giving Them a Much Needed Face Lift
- Available in a Wide Variety of Custom Colors

GLOW COAT

- Gives Indoor & Outdoor Water Slides the WOW Factor
- Makes Exterior Surfaces Come to Life At Night
- Available in a Wide Variety of Glow in the Dark Colors
